

A selection of itslearning fixes released on 17 November 2011

Description
Fill in the blank, Open answer and Short answer questions now support decimal numbers in alternatives.
The search criteria is now remembered when you click "Back to participants list"
Some log out problems in FEIDE has been addressed
In the card list, the name now links to the person profile
It's now possible to add links in itslearning without HTTP in front of the URL.
Hierarchy synchronisation in courses is now regulated by the Privacy settings.
All elements are now searchable in "Search in itslearning" (previously, you couldn't search for lessons, conferences, explaining sequences, folders, applications and page 2.0)
Hotspot images in Test 2.0 can now be added from folders other than My web files.
Deleted users no longer appear in assignment participant lists.
An "Unarchive" option is added in the teachers' archived course list.
We now support large file uploads in My web files. Earlier the upload limit was 50 MB.
Must change password on next login (changed to allowed after login) now work for early learners
Sorting in drop-down menu for courses in user administration has been implemented
Extensions on dashboard: Plug-in is no longer in front of the modal window
We've introduced a more user-friendly error page (not that it will ever be used ...)
Hierarchy synchronisation now updates as it should when you delete several hierarchies in one operation.
If you click "Cancel" in the multiple file-uploader you no longer get a server error.
You no longer experience server errors when changing domain distribution lists.
Planner: You now get correct date and time when using import XML.
The grade book now updates correctly.
The replaceGroups method in IMS ES has been improved
Deleted course profiles can now be assigned to a new profile
You no longer experience a server error when deleting a policy in the edit user page
Attendance now shows if it was set for missed sessions using the multiselector.
When turning off "create course" for a profile you no longer experience problems
Now all elements that show up in the students' assessment record also appear for the teachers.
User import with .csv files no longer fails because of large hierarchies.
When retrieving deleted content blocks you no longer get a server error.
Embedded videos no longer play simultaneously or start automatically.
Special characters now appears correct in content block links
You no longer get an error when deleting pages from My library that has been used in courses.
ePortfolio shortnames in uppercase now works.
The "Help" button on the Add note page now opens the corresponding page of the help.
It's now possible to select all messages in the message system and delete them.
When editing lessons the "week and day" now defaults to today's date.
The left menu in SCORM packages are no longer broken by poorly formatted element titles.
All learning object mouseovers in test 2.0 now contain text.
Exporting and importing of links will now include the description
The status is no longer shown instead of the assessment in the assessment record.
The progress report now list full progress for new users
"Allow login from these IP addresses" now works
Learners no longer receive messages about group assignments if an individual assignment answer is deleted.
Sorting by "Name" in attendance reports now works.
HTML tags in course titles no longer give a server error in My files.
The "More actions" and "Filter" drop-downs in the internal messaging system has been improved
The support for Britannica content in Internet Explorer 9 has been improved
The performance of Test 2.0 has been improved.
