Plus more soon to be announced...

10.00 – 14.00, Thursday, 27th April 2017
Cedar Court Hotel, Denby Dale Rd, Calder Grove, Wakefield WF4 3QZ

The focus:
The Government are implementing the new funding formula for schools which will negatively impact many budgets, however Ofsted will soon enhance their focus on how schools are improving the health of their pupils in light of the grant for PE and Sport increasing in September 2017. Data and outcomes in literacy and maths remain a priority but how can using current and future funding effectively impact on these areas and improve the mental and physical health of all young people?

Main discussion points:
• Using funding effectively to ensure the health and wellbeing of all young people are considered and improved
• How an active classroom can improve outcomes in traditional classroom based learning
• What do inspectors want to hear about how the Primary PE and Sport Premium is being spent?
• The school run is a major source of congestion. In addition, childhood obesity is at record levels while school transport budgets are facing an unprecedented squeeze. Increasing levels of active travel offers a solution to all of these challenges.
• What a local school has done to improve the health and wellbeing of its pupils

Please book your place now to avoid disappointment- there are limited places and we anticipate high demand for this seminar
